

PHASE 1

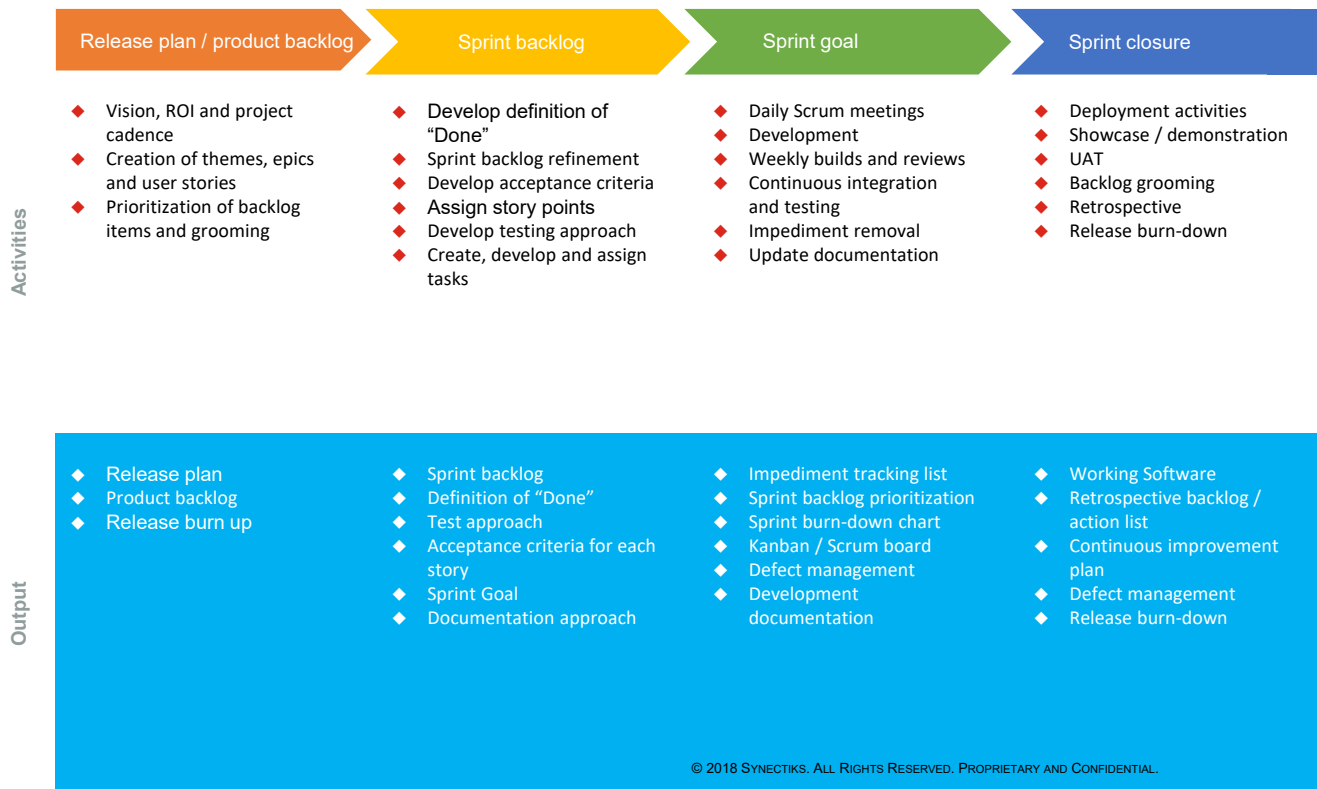

Proposed Project Timeline

Methodology

When recommending an Agile execution approach, Synectiks considers the following core activities and concepts to be the most critical to the success of project execution. While we are willing to be flexible on our execution approach, we believe that eliminating these activities reduces the effectiveness of the agile approach.

Process & Approaches

Assumptions:

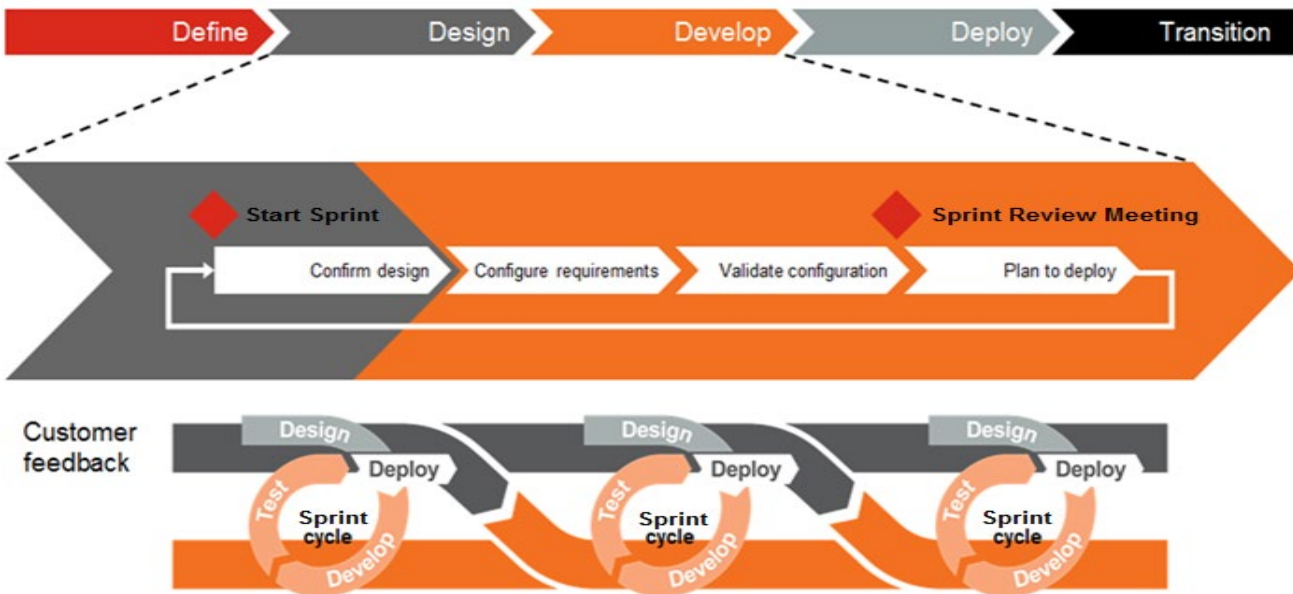

- 2 weeks design / development sprints
- Daily scrum check-in meetings

Acclaro Roles & Responsibility

- Require Product Owner role from customer to Articulate product strategy, vision and roadmap to stakeholders
- Prioritize and manage product back log.
- Synectiks representative to participate in daily scrum, sprint planning and retrospect meetings.

Synectiks Roles & Responsibility

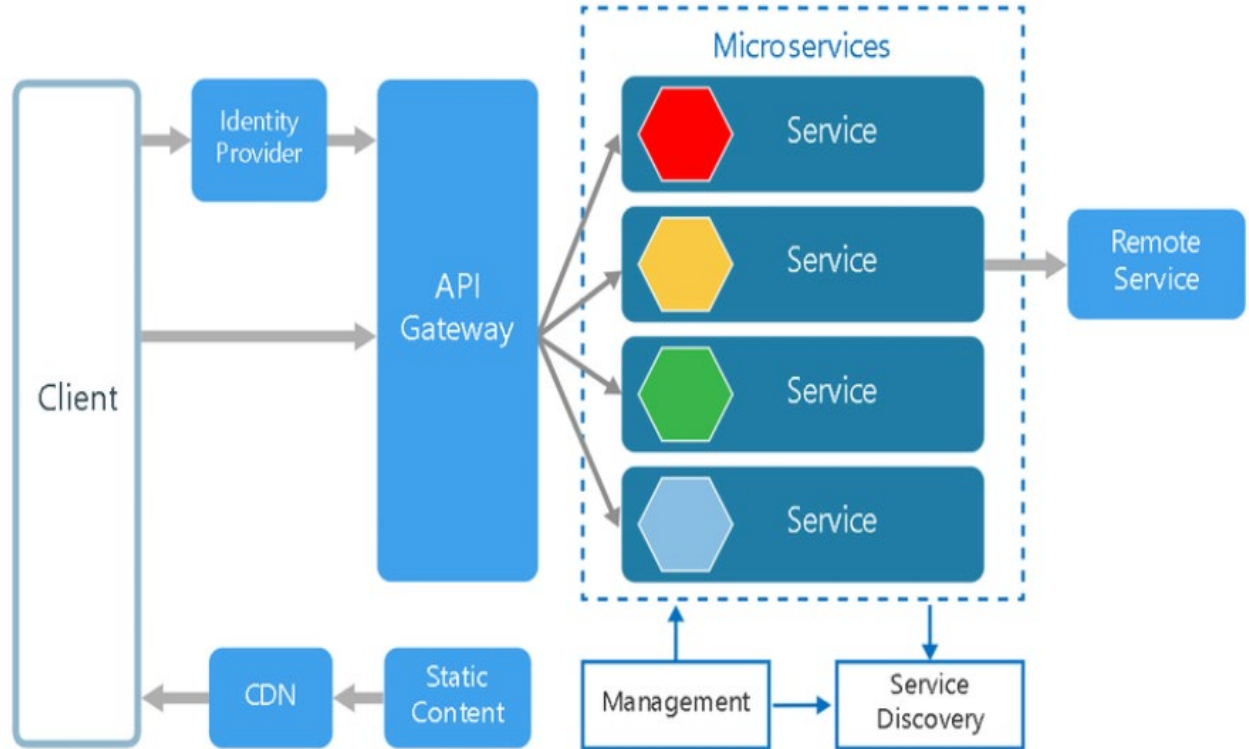

- Synectiks PM along with developers participate in daily scrum and report status
- Synectiks PM mitigate any risk from software delivery perspective.

Architectures & Development

Development Principle

We build custom solutions based on Cloud Native principles with micro-service-based architecture, driven by DevSecOps approach to add development velocity and site reliability. While we are willing to be flexible on our execution approach, we believe that adopting the most modern technology stacks and architecture principles are critical to the project success.

Estimated Time - 4 Months

Task	Role	Effort	Pricing
Product and Release Management	Project Manager	4 Man Months	Rate 20 USD/Hr $4*160*20=12800$ USD
Architecture and Planning	Architect	1 Man Week	Rate 60 USD/Hr $40*60=2400$ USD
UX Design	UX Designer	2 Man Month	Rate 25 USD/Hr $2*160*25= 8000$ USD
UI Development	UI Developer	2 Man Month	Rate 20 USD/Hr $2*160*20= 6400$ USD
Backend Development	DevOps	4 Man Month	Rate 30 USD/Hr $4*160*30= 19200$ USD
Business Analysis	Business Analyst	4 Man Month	Rate 15 USD/Hr $4*160*15= 9600$
			Total - 58400 USD
